Urban Heat: Two Observation Methods

Teaching example. All measurements are fictional.

Method A uses fixed observation stations.

Method B uses a moving observation route.

Question: were both methods sampled at the same time?

Reading Evidence

Fixed stations show changes over time.

Moving routes show differences across locations.

Select this sentence to demonstrate explanation.

A position discussion is not a selected quotation.

Review Before Accepting

Compare sampling conditions before drawing conclusions.

Record a note; discuss the document; inspect the report.

Saving a local note never starts an AI task.

You may pause, keep this project, or clean up the example.
